Fleetworthy™

# The Road Ahead: 2025 Trucking and Fleet Insights Report

How growing costs and inefficiencies drive the search for tech solutions

Fleet operators are overwhelmed by administrative burden and paperwork. Inefficient processes and systems can't keep pace with the requirements of modern trucking operations.

Without an advanced solution, fleet managers are stuck playing catch-up to compliance demands, risking regulatory penalties, financial repercussions, and operating inefficiencies.

**A recent survey of 300 US-based fleet managers & owner-operators revealed:**

High Cost of Compliance

96% of all respondents

have had to cut costs elsewhere to cover compliance expenses

Manual Processes Stall Efficiency

73% of all respondents

use a completely or somewhat manual process for managing tolls

51% of fleet operators

struggle with managing ELD requirements

Growing Administrative Burden

55% of fleet operators

say complex documentation requirements prevent them from onboarding new drivers efficiently

Compliance Doubts & Consequences

65% of all respondents

are unsure if their fleet would pass a DOT audit

90% of all respondents

have some level of concern over nuclear verdicts
