

RWE Clean Energy Cuts Costs and Accelerates Licensing with Fleetworthy's Full Technology Suite

As one of the nation's largest renewable energy providers, RWE Clean Energy is driving the clean energy transition through wind, solar, and battery storage projects across key U.S. markets.

At the heart of RWE's project delivery is a high-stakes, high-performance transportation network. Getting infrastructure and materials to job sites—on time, in compliance, and without disruption—is non-negotiable.

THE CHALLENGE

Keeping RWE's clean energy infrastructure in motion came with real-world roadblocks: slow vehicle licensing processes, toll management headaches, and driver delays at weigh stations. Each of these issues chipped away at efficiency, inflated operating costs, and introduced compliance risk.

The Vehicle Management team at RWE saw the problem clearly: "We needed to simplify our fleet operations and take control of compliance and cost visibility. We were spending too much time chasing paperwork instead of moving equipment."

The RWE logo, consisting of the letters 'RWE' in a bold, blue, sans-serif font.

THE SOLUTION

RWE turned to Fleetworthy, tapping into the only fleet technology suite that combines Vehicle and Driver Safety & Compliance, Toll Management, and Weigh Station Bypass under one roof.

VEHICLE LICENSING: FASTER, CHEAPER, SMARTER

The most dramatic impact RWE experienced with Fleetworthy was vehicle licensing and registration. What used to be a slow and costly bottleneck is now a streamlined, data-driven workflow. With Fleetworthy:

- Titles and IRP accounts are processed faster—vehicles are back on the road in days, not weeks or even months as they had been
- Cross-jurisdictional compliance is managed by experts, eliminating guesswork
- Renewal alerts and centralized dashboards keep the team one step ahead
- Idle equipment is reduced, cutting costs and accelerating deployments

TOLL MANAGEMENT: UNIFIED AND UNDER CONTROL WITH BESTPASS BY FLEETWORTHY

RWE ditched fragmented toll systems for Bestpass by Fleetworthy, gaining:

- Nationwide coverage with one device, one account
- A single invoice, saving time and eliminating billing confusion
- Insightful reporting for smarter route planning and cost control

WEIGH STATION BYPASS: FEWER DELAYS, HIGHER MORALE WITH DRIVEWYZE BY FLEETWORTHY

With Drivewyze, drivers spend less time in line and more time in motion. RWE now benefits from:

- Access to 900+ weigh station bypass sites
- Reduced fuel costs
- In-cab alerts that keep drivers informed and safe on the road

THE RESULTS

By leveraging Fleetworthy's full platform, RWE has realized meaningful and measurable gains:

- 40% faster vehicle licensing turnaround
- 15%+ reduction in vehicle-related compliance costs
- Increased on-time delivery performance
- Higher driver satisfaction and retention

**"It's getting easier.
Everything is becoming
more centralized
and efficient."**

— Rusty Bledsoe —
RWE Clean Energy, LLC

"It's getting easier. Everything is becoming more centralized and efficient," said Rusty Bledsoe, a member of the Vehicle Management team, reflecting on the tangible improvements to RWE's operations.

WHY FLEETWORTHY

Fleetworthy is the only fleet management technology suite with Toll Management, Weigh Station Bypass, and Safety & Compliance solutions under one brand. For RWE, this consolidation provides increased safety, compliance, and efficiency, and a clear path toward operational excellence.

Fleetworthy empowers fleets to streamline operations, reduce risk, and save money through proven solutions in toll management, safety compliance, and bypass technology. Supporting over 2 million vehicles and 30,000 customers, Fleetworthy is trusted by 60% of the top 200 fleets in North America.

40% faster vehicle licensing turnaround

15%+ reduction in vehicle-related compliance costs

Increased on-time delivery performance

Higher driver satisfaction and retention
